Subject: May 20th meeting

Hi George & Tina

There has been several conference calls with the industry group and MLCT and more to come in preparation of the May 20th NWG meeting. I wanted to make sure you know that the group feeling is that there has not been enough time to digest the August comments and Mr. King's report before the meeting. So they are looking forward to a discussion but will not be ready to support finalizing the new standards. You may already know this, but I did not want it to be a surprise. Personally, I am not sure some of the members will ever be happy. Hope you have a good weekend.

David D. Mumford, P.E.
